

## **Three ways to find out the upcoming demand for architects, builders, engineers and contractors to 2026**

Having visibility over future demand for work helps businesses large and small prepare for success – or batten down the hatches for a rough ride. The ACIF Forecasts is the building and construction industry's own service that provides reliable, comprehensive forecasts for building and construction across Australia, with detail for the next eight quarters and for the next ten years.

The next release of the ACIF Forecasts is only weeks away. There are three ways that your business can learn about demand across residential building, non-residential building and engineering construction work for all trades and professions:

- **Hear it LIVE when the head forecaster presents the ACIF Forecasts at an industry breakfast.**  
Held conveniently adjacent to DesignBUILD Expo at the Melbourne Convention and Exhibition Centre on Thursday 5 May from 7.30am to 9am, join the industry's leaders as they hear the outlook for residential building, non-residential building and engineering construction work demand, labour, costs and projects for the next ten years. Click here for more information: <http://www.acif.com.au/events/event/acif-briefing-may-2016>
- **Read the expert analysis and commentary of the industry's most comprehensive forecasts for building and construction across Australia.**  
[Australian Construction Market Report](#) includes the macro economic drivers behind the forecasts for all sectors nationally, then delves into the key areas of interest in all states and territories. This 80+ page Report gives you a clear description with numbers of the ten year outlook for 20 types of work, including apartments and townhouses, roads, electricity and pipelines, new residential dwellings and much more. Click here for more information: <http://www.acif.com.au/shop>
- **Query our database to find the numbers on the work you need, in the area you need, for the time period you need.**  
[Customised Forecasts Dashboard](#) subscribers have full access to the ACIF Forecasts numbers on work demand, labour requirements, construction costs. Plus over 5,500 Major Projects from Cordell Information listed by status, value and location. Click here for more information: <http://www.acif.com.au/subscribe/type/dashboard-subscription>

The ACIF Forecasts are a not-for-profit industry initiative available thanks to the support of industry partners. Australian Construction Industry Forum sincerely thanks Principal Partner Cbus Super and Silver Partners Cordell Information, DesignBUILD Expo and Viewpoint Construction Software for their ongoing support.

### **About ACIF Forecasts**

The Australian Construction Industry Forum (ACIF [www.acif.com.au](http://www.acif.com.au)) has released comprehensive ten year forecasts for building and construction in Australia since 2002. The [ACIF Forecasts](#) are released twice a year and cover residential building, non-residential building plus engineering construction in 20 work types, all across Australia.

Principal Partner

Partners

The ACIF Forecasts are produced with high quality data by leading economists, with a unique peer-review process to ensure high quality, relevant and credible information. ACIF's [Construction Forecasting Council](#) is a hand-picked panel of researchers and economists that ensure the numbers take into account true market conditions, to provide users with highly accurate information.

ACIF Forecasts are released twice a year, and are available as [Australian Construction Market Reports](#), and detailed numbers are available by subscribing to the [Customised Forecasts Dashboard](#). More information about the ACIF Forecasts is available from [www.acif.com.au/forecasts](http://www.acif.com.au/forecasts).

### ***About Australian Construction Industry Forum (ACIF)***

Australian Construction Industry Forum (ACIF) is the cohesive, trusted voice of the Australian Construction Industry. ACIF facilitates and supports an active dialogue between the key players in residential and non-residential building, and engineering construction, other industry groups, and government agencies. ACIF's focus is on innovation, collaboration, equity and sustainability for the industry.

ACIF Members are the most significant Associations in the industry, spanning the entire asset creation process from feasibility through design, cost planning, construction and building and management. ACIF harnesses the resources of its Members to research and develop initiatives that benefit businesses of all sizes, from the largest of construction companies to small consultancies. More information on ACIF is available from [www.acif.com.au](http://www.acif.com.au).
